DETAILED ACTION

This action is responsive to the amendment filed 03-09-2004, which has been entered.

Claims 1-15 are currently pending.

Terminal Disclaimer

1. The terminal disclaimer filed on 03-09-2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US patent number 6,033,331 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1, 4-5 and 7-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear as to what magnitude is very small or almost without means. These phrases are unclear and confusing. These terminologies will not be given any weight in the claims.

Allowable Subject Matter

3. Claims 1, 4-5, 7-10, 1/13 and 14 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

4. Claims 2-3, 6, 11, 12, 2/13, and 15 are allowed.

Response to Arguments

5. Applicant's arguments, filed 3/09/2004 with respect to claims 2 and 6 have been fully considered and are persuasive. Therefore, claims 2 and 6 and all the claims that depend from these claims are allowed.

6. Applicant's arguments filed 3/09/2004 have been fully considered but they are not persuasive. Applicant contended that the phrases "very small nominal tension" or "almost without any tension" is described in the specification on pages 7, line 33 to page 8, line 7. In response, in page 8, line 1-7, states that some very low or almost null has an e.g. of 5N. Therefore, in regard to this expression, very low or almost null is subjective and relative. Such phrases in the claims have not been given any patentable weight because the specification has failed to clearly describe their meaning as related to this invention.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
